Stray Dog Feeding

March, 2024

The month had a lot to do with their welfare.

With every meal served, treatment administered, and surgery performed, we're making strides in bettering the lives of these vulnerable creatures.

Throughout the month, our doors remained open, welcoming in animals seeking refuge and care. From vaccinations to surgeries, our veterinary experts provided vital medical attention, ensuring each animal receives the care they deserve.

## **RESCUE AND TREATMENT-76**

In March 2024, our animal rescue team embarked on a heartfelt journey, rescuing a staggering 67 stray dogs from dire circumstances. These precious souls were found battling through unimaginable challenges – from severe maggot infections to heartbreaking accidents, fractures, tumors, cancers, wounds, and various other illnesses. Despite their suffering, each one of them showed remarkable resilience and an unwavering spirit.

With tender care and dedicated attention, we provided them with the medical treatment and love they desperately needed. As they now rest in the safety of our shelter, we remain committed to ensuring they receive the best possible care, and with your continued support, we can offer them the chance for a brighter, healthier future. Together, let's make a difference, one rescue at a time.

# Stray Dog Feeding

Each day, our dedicated team ensured that 350 stray animals receive the nourishment they need to thrive. Through this initiative, we're not only providing sustenance but also showing compassion and care for our furry friends who rely on our support. With your continued support, we can expand our reach and make an even greater impact on the lives of these animals in need.

Thanks to Ms.Aparna for sponsoring 4 days' meals.

## Veterinary Surgeries- 48

Under the skilled hands of our vet surgeon, numerous life-saving surgeries were performed with utmost success. From essential spay and neuter procedures to complex surgeries like pinning, orthopedic interventions, tumor removals, hematoma treatments, and even amputations, our team spared no effort in ensuring every animal received the care they deserved.

These surgeries not only alleviate suffering but also pave the way for brighter, healthier future for our furry friends.

- Vaccinations-137
- Outpatients- 84

# Free Anti-Rabies vaccination Year

For more details:  
94870 07552

**Bark India is offering free anti-rabies vaccinations for an entire year, starting from April 2024 until April 2025. The initiative is only for Indie-Mongrel dogs to appreciate mongrel pet parents and to encourage adoption. Ensuring the safety and well-being of our four-legged companions is paramount, and this offer provides a golden opportunity to do just that. Don't miss out on this invaluable chance to protect our cherished animals.**

**Bring your pets and our community dogs to Bark India Veterinary Clinic and enjoy the benefit of a whole year of free vaccinations. Let's keep our furry friends safe and healthy together!**

## Adopt Us

**Male labrador, 2 year old, sterilized, vaccinated, dewormed, friendly and active**

**Female pomeranian, 3 year old, sterilised, vaccinated, friendly, suitable for family or individuals**

Be their voice!

## They Need You!

Stray animals suffer from various health issues, including infections, injuries, and diseases. Providing them with medical care ensures their health and well-being. This not only alleviates their suffering but also reduces the risk of disease transmission to other animals and humans.

Stray animals deserve compassion and care. They are often victims of neglect, abuse, and abandonment. Public support for their medical care reflects societal values of compassion and empathy towards all living beings.

- Monetary Donation
- Dog/Cat foods
- Veterinary Medicines
