RESCUES

In the new year!

As we welcomed the new year, Bark India would like to extend our heartfelt gratitude to all our generous donors. Your support has been instrumental in helping us continue our mission to care for and uplift the lives of strays.

Thanks to your kindness, we are starting this year with renewed hope and determination to reach more animals in need, offering them food, shelter, medical care, and love.

Together, we can make a lasting difference in the lives of these vulnerable creatures. We look forward to your continued support as we strive to create a brighter, kinder future for all animals in our community.

Thank you for being a vital part of our journey!

Our approach doesn't stop at rescue and treatment. They actively engage with local communities, conducting awareness campaigns to promote compassion and understanding toward strays.

By educating people about responsible pet ownership, humane behavior toward animals, and waste management, they aim to create a harmonious coexistence between humans and animals.

Number of animals rescued so far- 8214

Number of animals under treatment- 96

Rescue and Treatment - 140

Reaching out with helping hands

In January 2024, Bark India rescued and treated 140 stray animals, marking a busy start to the new year. While the surge in rescues highlights the ongoing struggles of strays, we are grateful for the opportunity to extend our care to those in need. Every rescue is a step toward a kinder world, and with your support, we continue to heal and protect the voiceless.

Veterinary Surgeries- 93

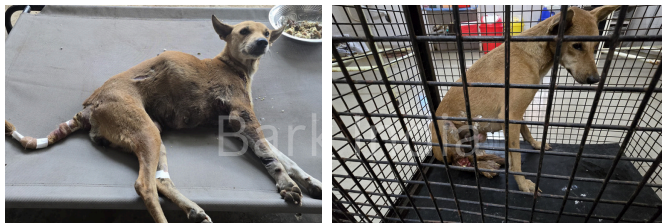

January began with numerous rescues, making our work challenging due to limited resources and manpower. However, with the dedication of our staff, veterinary team, and the generous support of donors and rescuers, we managed to provide timely care to the animals in need.

Bark India Charitable Trust performs life-saving surgeries for rescued strays, from spaying and neutering to complex procedures like pinning, orthopedic corrections, tumor removals, eye surgeries, and hernia repairs.

With expert veterinary care, they ensure injured and sick animals get a second chance at life.

Each rescue reinforced our commitment to saving lives and ensuring their well-being. As we move forward, we continue to rely on your kindness to help us create a safer world for strays. Thank you for your unwavering support!

Outpatients- 142

January saw a high number of outpatients, with 140 animals receiving treatment. The majority were stray animals provided with free medical care, including life-saving surgeries.

Our veterinary team worked tirelessly to ensure each patient received proper diagnosis and treatment. Despite our resource limitations, we remained committed to offering the best possible care.

Vaccinations- 106

As part of our mission, Rabies-Free Pondicherry, Bark India Charitable Trust conducted a free vaccination camp this month, ensuring 106 stray dogs received life-saving anti-rabies vaccines. Rabies is a 100% preventable disease, and vaccinating strays plays a crucial role in protecting both animals and humans.

Our team is dedicated to creating a safer environment through sustained vaccination efforts. If you wish to organize a free rabies vaccination camp in your area, we are happy to collaborate and extend our services. Together, we can work towards a rabies-free community. Contact us to make a difference in your locality!

As part of 'Rabies-free Pondicherry', free Anti-Rabies vaccination for mongrel dogs is going on at Bark India clinic till 31st March. Get your pets/ community animals vaccinated for free/ contact us to conduct free vaccination camp in your area.

Veterinary Internship

Veterinary internship of interns of Rajiv Gandhi Institute of Veterinary Education and Research education is going on.

HELP US CONTINUE!

Bark India Charitable Trust continues to rescue, treat, and care for strays in need, but we can't do it without you. Your generous monetary and in-kind donations—pet food, medicines, and supplies—help provide life-saving care to injured, sick, and abandoned animals.
