

APRIL
2025

BARK INDIA CHARITABLE TRUST

Welcome to the April 2025 edition of Bark India's monthly newsletter! This month, we continued our mission to rescue, treat, and care for street animals in need while spreading awareness on animal welfare through our outreach programs. From life-saving rescues and successful adoptions to impactful school sessions and generous donations from our supporters, April was filled with compassion and progress.

Your continued support helps us create a safer, kinder world for animals. Dive in to see the highlights of this month's work and how, together, we are making a lasting difference.

RESCUE AND TREATMENT- 71

Bark India continued to be a lifeline for countless suffering strays. From painful maggot wounds to tumors, cancers, broken bones, high fevers, and severe injuries, our rescue and treatment team worked tirelessly to provide timely medical care and healing.

Every animal, regardless of how critical their condition was, received compassionate treatment, shelter, and a chance at recovery.

Many were rescued from the brink of death and are now on the road to a better life. With your support, we're turning pain into hope and giving countless voiceless beings the second chance they truly deserve.

BEFORE

AFTER

Adoption-4

We have been trying hard to find forever homes for our fur kids- especially cats, puppies, abandoned non-Indie dogs and handicapped animals. We still have more than 15 puppies waiting for their happy homes. Please adopt, don't buy when rescue animals have no place to go for a second life.

VETERINARY SURGERIES- 45

With all the available facilities, advanced equipment, and our dedicated team, Bark India performed 45 veterinary surgeries in April 2025. Our efficient doctors and skilled surgeon carried out critical and life-saving procedures, as well as neutering surgeries, to ensure a healthier future for street animals. Our operation theatre is well-equipped with essential medical tools, including a heart monitor, hematology analyzer, X-ray machine, muscle stimulators, oxygen concentrator, and more.

These resources allow us to provide high-quality surgical care to animals in need. Many of the surgeries performed this month were on animals suffering from severe injuries, tumors, fractures, and other medical conditions. Thanks to timely intervention and compassionate treatment, these strays are now on the road to recovery. Each surgery not only saves a life but also helps control the stray population humanely through sterilization. With your continued support, we strive to offer hope and healing to the voiceless every single day.

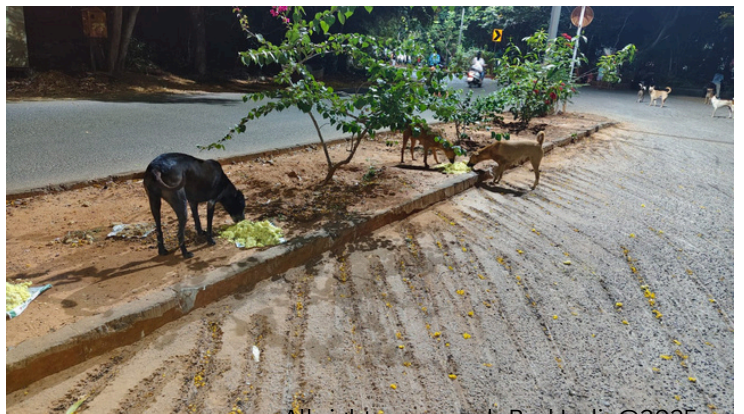

Stray Dog Feeding

120 strays every day and 350 strays twice a week, we are continuing to contributing to their welfare.

Sponsor a meal on your / your pet's special days and be the reason for their wagging tails and happy stomachs.

Outpatients- 76

76 new animals have been treated as outpatients in the month, that all the strays got free medical care, including necessary surgeries.

Vaccinations- 77

Free Anti-rabies vaccination for mongrel dogs and cats are going on at Bark India. Get your pets/community animals vaccinated for free.
